## Step 1 — Locate Battery.

- The battery is located inside the right side ear piece.

## Step 2 — Heat Right Side.

- Heat the right side gently at 140 F for about 3 minutes.
- Do not over heat or it will melt the housing.

### Step 3 — Remove Battery Cover/Casing

- After heating, gently remove the cover/casing as shown in the picture.
- Take your time and re-heat if cover/casing does not remove smoothly.

### Step 4 — Desolder & Replace Battery

- Desolder battery using soldering iron and replace with replacement battery.

## Step 5 — Reattach Battery Cover/Casing

- After battery is replaced, apply super glue to the border of the inside of the battery cover/casing and put it back in place.
- Use small clamps/binder clip to hold the housing in place while the super glue dries up.

To reassemble your device, follow these instructions in reverse order.
